To: Alta Data Technologies (Alta) Customers and Distributors

RE: Dodd-Frank Conflict Minerals Review

The Dodd-Frank Wall Street Reform and Consumer Protection Act ("act") was signed into law by on July 21, 2010. For many Alta customers, Title XV and the "Disclosures on Conflict Minerals in or near the Democratic Republic of the Congo (DRC)" may apply.

Per the law, **public** (not private) companies are required to survey their supply chains and report possible usage of certain conflict minerals.

Alta is NOT a public company, but along with our suppliers, we have conducted an audit/review of components used in Alta products to aide our customers with their surveys.

The materials we have identified as possible "conflict minerals" are gold and tin.

- All Alta products contain gold (except cables)
- Tin is used in subcomponents and solder of all products

To the best of our knowledge, Alta is compliant with the act and other regulations concerning the sourcing of our raw materials from conflict areas.

We will continue to monitor and analyze product components and work with our suppliers to maintain the compliance with the act.

For further information, please contact the undersigned.

Kind Regards,

Richard Schuh
CEO
