

## MIL-STD-1553 • AS4111/AS4112 Validation Software - *AltaRTVal*<sup>™</sup>

*AltaRTVal* provides the most advanced MIL-STD-1553 COTS validation tool in the industry. The software implements the protocol tests (5.2) for both the SAE AS4111 RT Validation Test Plan and the SAE AS4112 RT Production Test Plan to simplify design and production validation.

## Easy, Flexible Setup

- Setup Per AS4111 and AS4112 or Tailor to the specific UUT Remote Terminal.
- Supports all Legal and Illegal Message Combinations (as do Alta Interface Cards)
- Program Prompts User as needed for Interactive steps (Setting/Clearing Status Word Bits, etc.)
- Test Both A and B Busses or Only One as Needed

For complete validation testing, including electrical and noise rejection tests, we recommend Test Systems, Inc. (www.testsystems.com). AltaRTVal tests may vary verses Test Systems.
 A system may pass AltaRTVal and fail Test Systems tests (or vice versa) – test implementations and interpretations can vary. AltaRTVal is meant to prepare for, not guarantee, Test Systems results.
