## High Density MIL-STD-1553 Interface for XMC Systems

**1-10 1553 Channels!  
Highest Channel  
Density in the Industry!**

Alta Data Technologies' XMC-1553 interface module is a high density 1553 interface configurable with 1-10 1553 channels. The XMC-1553 card is based on the industry's most advanced 32-bit FPGA protocol engine, **AltaCore™**, and by a feature-rich application programming interface, **AltaAPI™**, which is a multi-layer ANSI C and Windows .NET (MSVS 2005/08/10/15 C++, C#, VB .NET) architecture. This hardware and software package provides increased system performance and reduces integration time.

**AltaCore-1553** is guaranteed 1553B Notice II & IV and ARINC compliant and all cards are manufactured to the highest IPC-610 Class 3 standards and ISO 9001:2008 processes. Cards are available in 1553 dual-function (BC/Mon or multi-RT/Monitor) or full-function (BC, mRT and Mon) configurations. Playback and Signal Generation are part of BC operations and Waveform Capture is for Monitor only operation. Alta is committed to a risk free integration and will be glad to help with any level of your system development.
